

Tugce Vatansever Gunduz

Frontend Developer

I hold a master's degree in Management Information Systems and after relocating to Luxembourg, I decided to transition my career to become a frontend developer. With a focus on HTML, CSS, and JavaScript, I have dedicated myself to refining my skills in these areas. I actively participated in a ReactJS Bootcamp organized by Kodluyoruz.com and completed the program, showcasing my projects on my GitHub profile. Eager to embark on a frontend development career, I am ready to embrace new challenges and forge a professional journey in this field.

Master Degree

Management Information Systems
Istanbul University / Turkey

2009 - 2013

Bachelor Degree

Teacher Training in Computer and Control
Marmara University / Turkey

Expertise

- HTML
- CSS
- JavaScript
- NodeJS
- ReactJS

Language

Turkish

English

Experience

○ August 2022 - October 2022

Kodluyoruz.org Turkey

Attendee of the Frontend Web Development BootCamp Program

During the Front-End Web Development BootCamp, I completed a comprehensive program with a focus on React. One of the standout projects was the Weather Forecast App, where I developed a web application that provided weather forecasts for cities in Turkey using a weather API. This project involved implementing key aspects such as authorization, routing, global state management with Context API, styled-components for styling, high-order components for code reusability, error boundaries for effective error handling, and responsive design implementation. It was a highly productive experience that further honed my skills in web development.

○ April 2022 - June 2022

Kodluyoruz.org Turkey

Attendee of the Frontend Web Development BootCamp Preparation Program

In preparation for the Frontend Web Development BootCamp, I completed a comprehensive preparatory course that focused on HTML, CSS, and JavaScript. Through project-based learning, I gained a solid understanding of these programming languages and developed proficiency in creating structured web pages using HTML, styling them with CSS, and implementing interactive features using JavaScript. These experiences have equipped me with the necessary foundation to excel in the ReactJS BootCamp and advance my expertise in web development.

○ January 2014 - May 2021

Samsung Electronics Turkey

Reporting and Analysis Assistant Manager

During my tenure as a Reporting and Analysis Specialist at Samsung Electronics Turkey, I handled a range of responsibilities within the Customer Relationship Management department. These included analyzing and assigning return cases, generating daily order management reports, forecasting monthly return quantities, efficiently managing warehouse stock, and utilizing KPIs to improve customer satisfaction. With a detail-oriented approach and strong analytical skills, I contributed to the success of the Customer Relationship Management (CRM) department. Notable achievements included optimizing the IMEI registration process, resulting in cost savings, and effectively managing warehouse stock to enhance customer satisfaction.
